

Trade fair report of the 12th symposium on indoor radio in Fulda

Organized by the Bundesverband für Objektfunk in Deutschland e.V.
(Federal Association for Indoor Radio Germany)

In 2023, the Bundesverband für Objektfunk in Deutschland e.V. (Federal Association for Indoor Radio in Germany) once again hosted its annual specialist conference on object radio in Fulda/Germany. For the twelfth time, experts from this sector met to discuss the latest developments, challenges and innovative solutions in the field of object radio. **Celsion Brandschutzsysteme GmbH** was an active exhibitor from May 23 to 24.

Boris Schubert (Managing Director), Tobias Stein and Daniel Linke (Sales)

The symposium covered a wide range of topics related to object radio. The focus was on:

Technological advances in indoor radio:

Members and interested parties shared information on the latest technological developments in the field of indoor radio communication and discussed their implications for the future.

Possible applications in the case of fire:

Various areas of application of object radio in the fire protection sector were highlighted, including monitoring, communication in emergency situations and coordination of rescue operations.

Safety aspects and provisions:

The importance of safety standards and provisions in relation to object radio in fire protection was discussed intensively in order to ensure effective and reliable communication.

The symposium also presented an impressive selection of presentations from well-known experts in the field. Managing Director of *Celsion Brandschutzsysteme GmbH*, Boris Schubert, once also gave keynote speeches.

The symposium provided numerous opportunities for networking and discussions. Participants had the chance to share their experiences, discuss challenges and look for solutions together.

The exchange with partners, interested parties and participants was very constructive and was rounded off by the interesting and well-organized conference topics presented by the speakers.

The 12th symposium on Indoor Radio was an important event that provided valuable insights into the latest developments and trends in the field of indoor radio. The event showed that the continuous development of this technology is of great importance for the effectiveness and safety in all areas of our lives. The symposium was a big success and made a significant contribution to raising awareness of the importance of indoor radio. The ideas and findings presented will help to further improve safety and communication in emergency situations.

Celsion Brandschutzsysteme GmbH would like to thank all members and interested parties who contacted us with questions and interest. Special thanks goes to Mr. Jürgen Schleicher, who provided us with advice and support.

Signed: Tobias Stein, Celsion Brandschutzsysteme GmbH
